

TCM ELECTRONICS

TIME CRITICAL MANUFACTURING

TCM eNews

Outsource with Confidence!

TCM Travel

Since our last newsletter we have been travelling extensively throughout Australia, and also overseas, visiting our valued clients and many new potential customers. We always come away extremely impressed with the level of expertise, ingenuity and enterprise happening in the OEM market that we serve and it provides great confidence for high quality manufacturing in this country.

We want to thank our existing clients for their valued business and also the many new potential customers for the opportunities we have been given to become involved with their products as well. Please feel free to contact us if there is any other information you require about our capabilities.

Quality Audit

Our annual ISO9001:2008 audit was carried out in July and we are pleased to announce that we passed again with flying colours with 'zero' for both *areas of concern* and *non-conformances*. We are ready for an audit every day as our quality system *is our system* that we do use every day to run our business – not something we have bolted on afterwards.

Clients that have dealt with NON quality accredited suppliers would well understand the value of a solid Quality Management System...and it doesn't stop with hanging an ISO9001 certificate on the wall! It must be ingrained at all levels and aspects in an organisation.

ElectroneX Trade Show (Melbourne 2013)

TCM is an exhibitor at this year's ElectroneX trade expo (Tuesday 11th & Wednesday 12th September 2013) in Melbourne. If you are planning on attending please make sure to visit us at our stand (No. A2) and meet our Managing Director, Production Director and Sales Manager. We would appreciate the

opportunity to answer any questions you have and provide you with all the information about TCM Electronics capabilities and solutions. If you contact us prior to the show we can supply you with 'Free' entry passes.

A new way to find old stock

Over the years TCM has built up a very wide range of old, obsolete and hard to find parts. We have now separated these from our regular stock into a special category within our inventory system and they can be viewed on line by both our customers and suppliers. By simply clicking on the link below this will automatically take you through to our company drop box location to the full list of these parts.

<http://db.tt/R4dwsgKo>

If you are interested in any of these parts to support your legacy products and want to confirm its use in a previous product, then please contact us at sales@tcmelectronics.com.au We have records going back 21 years showing its product use history.

New Improvement Plan

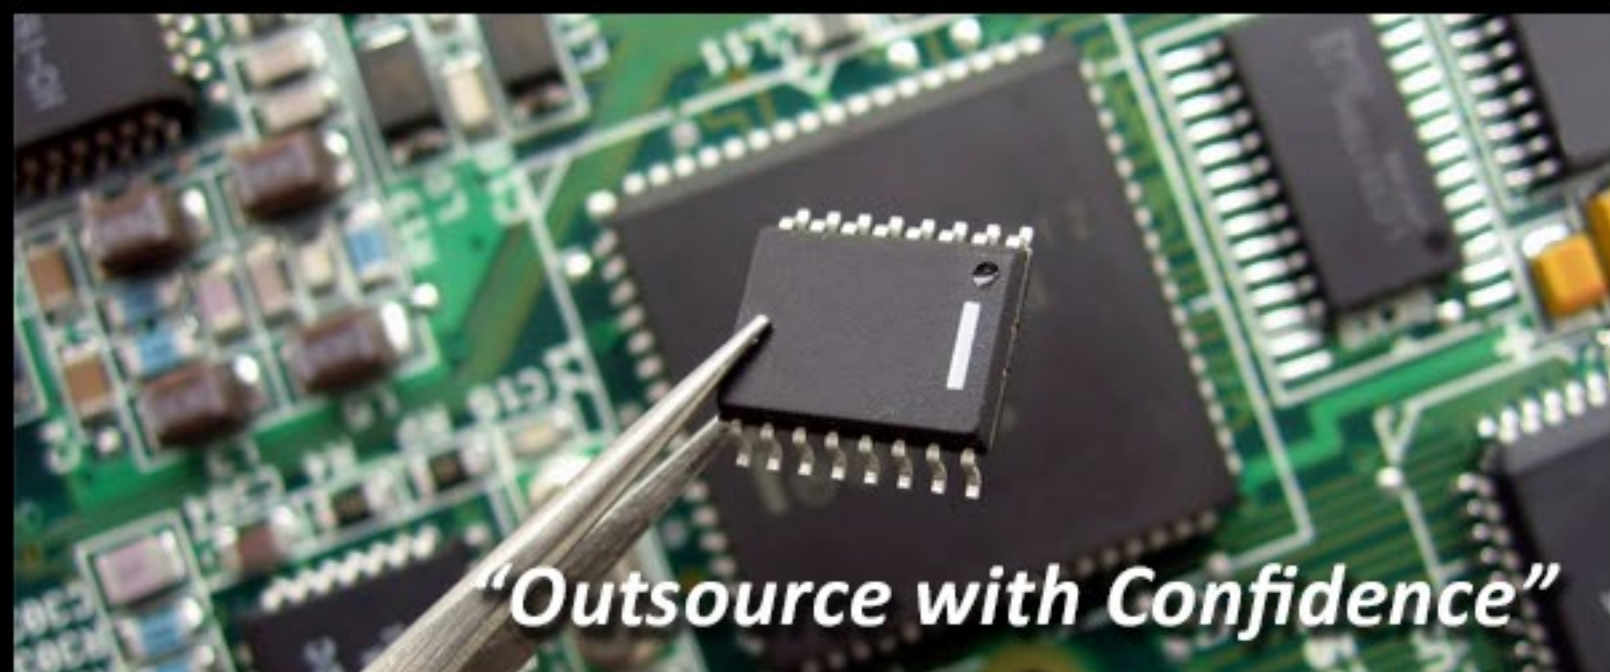

Each year, as part of our continuous improvement objective, TCM devises an improvement plan. What we list each year varies greatly and will range from building modifications down to minor report changes! Some of the main points for this year include:

- Expanded training programmes
- Building modifications
- Additional staff positions
- Modifications to our MRP system
- Moving more towards paperless processes!

CNC Machining

Our in-house metal and plastic fabrication workshop can offer a range of services with up to date CNC lathes and mills along with a range of precision equipment. Send through your files today to sales@tcmelectronics.com.au for TCM to provide a quotation on your machining requirements.
