

TCM ELECTRONICS

TIME CRITICAL MANUFACTURING

TCM eNews

Outsource with Confidence!

I am pleased to announce in our first TCM Electronics eNews letter of 2017 that we have just completed the commissioning of a new surface mount machine, adding to our existing lines. This will benefit all our clients in several ways. Firstly the new machine will be the fastest in our lines meaning run times are reduced therefore reducing lead times to our clients. This will free up one of our surface mount machines that TCM will now be able to dedicate for smaller runs including proto-types for PCBA's with fine pitch components or BGA's unable to be hand placed. With faster run times reduces lead times allowing TCM to meet the strong customer demands of increasingly shorter lead times including those 24 to 48 hour turnaround times that we see on a regular basis.

The new machine has been running for several days now and as with all new equipment it has not come without the minor but expected challenges. We are thankful over the initial challenges which had caused some delays to products in the current schedule.

In every effort to make up lost ground we are running extra shifts allowing our catch up to be fast tracked, but we are ever mindful of the end result of the product to not cause errors and non conformances. As a company we

apologise for any inconvenience seen and upcoming that may show a slight delay of your order but rest assured we all are doing everything possible to negate these delays. That's the fine balancing act as a high end, high tech manufacturer that speed cannot outpace quality!

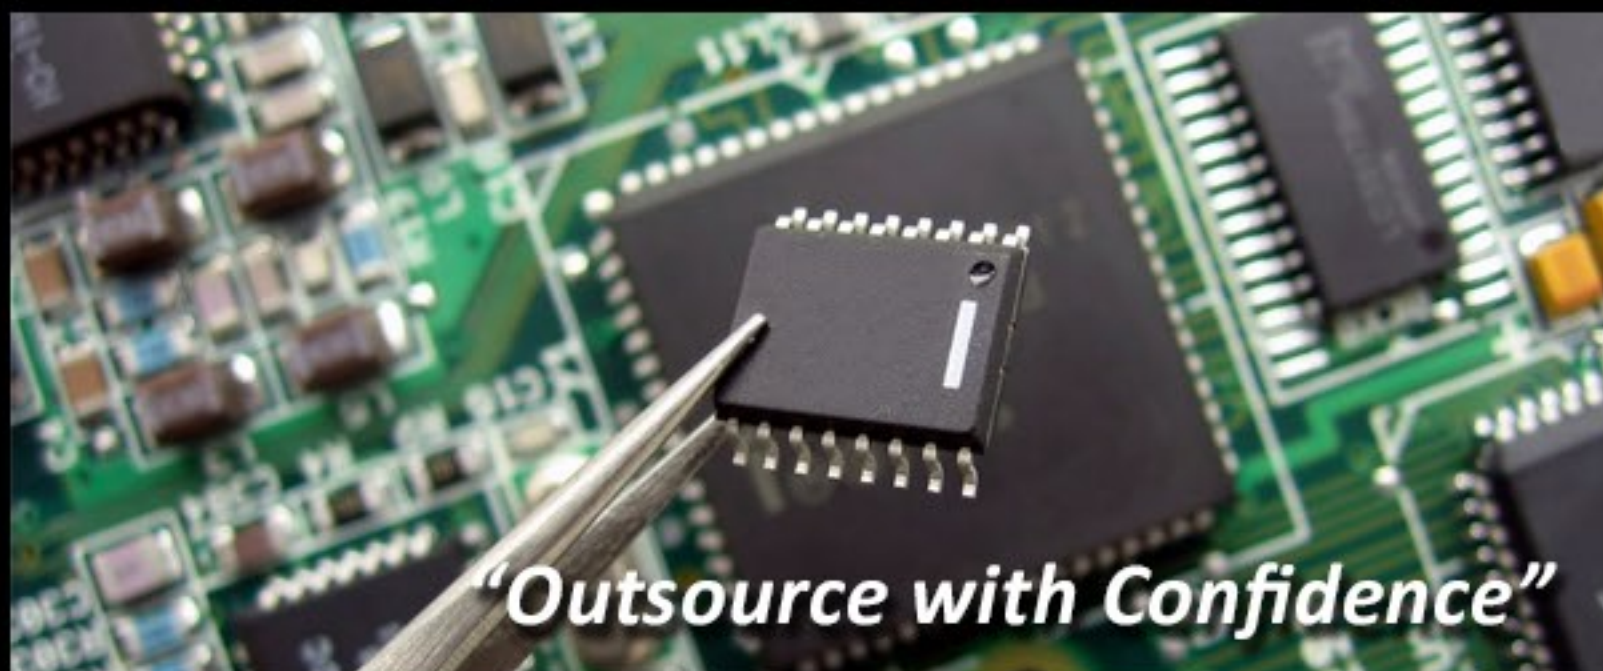

On the positive TCM and all our staff continue to strive for excellence with the products we manufacture. Everyone at TCM understands the only way to expand our production lines and improve our processes all come from our amazing clients and the products we produce for them. TCM in June of this year will celebrate a major milestone with our 25th year in business. This is of course only possible as a result from our long term relationships (and some quite new) with our clients across the whole of Australia, New Zealand, Switzerland, India and many other parts of the globe.

As always anything TCM can assist with for your company continue to speak with your TCM Sales Manager or direct with myself. We are here to help.

Thank you again for your support, orders and opportunity to quote on your products and we will speak soon

Regards,

Nathan Case
