Final Assembly at your Finger Tips!

Do you have labour intensive, final assembly work that you would like to outsource? Whether its cable assemblies, final box builds, protective coatings or testing, TCM can offer very competitive options that will complement our PCB-A procurement and loading service. By outsourcing final assembly, OEMs can:

- Minimise unnecessary overheads
- Enable your key staff to focus on core business functions
- Receive a consistent level of quality
- Budget total production costs precisely, in advance
- Have manufacturing capacity at call – when needed

Speak to your TCM representative today to find out more!

10 Year Milestones

Recently we have had two more employees reach their 10 year service milestones with TCM. We would like to take this opportunity to thank them both very much for their service, customer dedication and commitment to quality over that time.

Shane Kelly

Shane Kelly, as Stores Manager, holds a pivotal role and is a crucial link between production staff, account managers, suppliers and customers. Suffice to say that Shane will normally see everything that comes into, and out of the building!

Marco Ozzella

Marco Ozzella, as Account Manager, looks after a very diversified group of customers spread across S.A., Victoria, N.S.W and even Switzerland! Lucky for us he speaks German! With his extensive electronics qualifications and experience he has become a vital resource for his customers. Marco also fulfils the important position of Manufacturing Quality Manager.

Well done guys!

Membrane Keypads, Overlays & Labels

TCM Electronics has extensive experience with the supply of Membrane Keypads, Labels and Overlays. If you use any Electro-graphic materials in your products then try TCM for your next production run - we can supply separately or have them included in your bill of materials for when we next manufacture your product. TCM has the skills to properly interpret your needs and give you the best value for money. Some options from our Electro-graphics range are:

- Embossing of keys or decorative (company logos etc.)
- Full range of Polyester, Polycarbonate, PETG, Aluminium facia materials and more
- High performance adhesives for all applications
- UV Stable materials to stop fading from direct sunlight
- Screen Printed or Digitally printed facias
- Vast range of material thicknesses
- Laser, Knife or Die Press cutting
- Membrane Keypad tail connections for all pitch requirements (E.g. 2.5mm, 1mm)
- Product samples to approve final design and fit before production begins
- Pad printing directly to containers, boxes, mouldings
- Pantone & CMYK colour options
- Epoxy resin labels giving a 3D bubble appearance
- Backlighting. EL (Electroluminescence), Lumitex or Phosphorous inks that light specific areas of product

Christmas Closure Dates

TCM's administration department will be closed on Friday 12th of December for training. Our manufacturing division will continue to operate on that day though.

TCM will close for the Christmas period from 12pm Friday 19th of December and return on Monday 12th January 2015. Limited sales and production staff will be onsite during the week commencing the 5th January. For any emergencies during this period please email our sales addressing where we will be able to respond to your question/s throughout this closure period sales@tcmelectronics.com.au
