

## Outsource with Confidence!

### In this TCM eNews Edition:

- Movember
- Final Assembly at your finger tips!
- Excess Stock Letters Update
- Christmas Break
- Facebook

### Movember

In a highly male employed industry what better way to support men's health than in November to grow a moustache as part of Movember!

If you wish to be involved in the TCM team then click the link below and help by donating. Every dollar counts and just growing a moustache with people noticing it and thinking about men's health adds to the cause.

<http://mobro.co/tcm2015>

- Prostate Cancer
- Testicular Cancer
- Poor Mental Health
- Physical Inactivity

These are some of the biggest health issues faced by men. Together we're tackling them face-first.

TCM will apologise to all our customers and suppliers who may be in contact with us during this month as we're pretty certain there's going to be a few shocking mo's amongst us!

### Final Assembly at your Finger Tips

Do you have labour intensive, final assembly work that you would like to outsource? Whether its cable assemblies, final box builds, protective coatings or testing, TCM can offer very competitive options that will complement our PCB-A procurement and loading service. By outsourcing final assembly, OEMs can:

- Minimise unnecessary overheads
- Enable your key staff to focus on core business functions
- Receive a consistent level of quality
- Budget total production costs precisely, in advance
- Have manufacturing capacity at call – when needed

Speak to your TCM representative today to find out more!

### Excess Stock Letters Update

By now many customers would have received excess stock letters at the completion of particular orders. The letter highlights the more significant components that are accruing on your 'excess stock register' so that early action can be taken to avoid, or minimize, the invoicing of these components to you. As part of our standard terms and conditions, TCM monitors 'customer specific' excess stock and reserves the right to invoice out these components if not used within a 6 month period. You will always be notified prior to this occurring however.

This information should be of assistance to your accounts, engineering and operational departments by:

- Ensuring production schedules are planned in time for products that are not on order.
- Promoting common part usage across assemblies where possible.
- Providing a detailed financial picture of the total cost of the product for budgeting purposes.

If you have any questions please do not hesitate to contact your Sales Manager or Nathan Case (TCM Electronics' Managing Director) to clarify any questions you may have.

### Christmas Break

TCM will close for the Christmas period from 12pm Friday 18th of December and return on Monday 4th January 2015. Limited sales and production staff will be onsite between 21<sup>st</sup> to 23<sup>rd</sup> December to assist with any urgent pre-Christmas projects.

For any emergencies outside these dates please email our sales address where we will be able to respond to your question/s throughout this closure period [sales@tcmelectronics.com.au](mailto:sales@tcmelectronics.com.au)

### Facebook

For those on social media we ask if you 'Like' our TCM Electronics page. We place all eNews notifications along with special events that occur or coming up. 2016 is looking to be a busy year for all our customers. Being able to post notifications of what's occurring for our customers is a great thing for everyone. The link to our facebook site is
