Christmas - It's Coming Again!

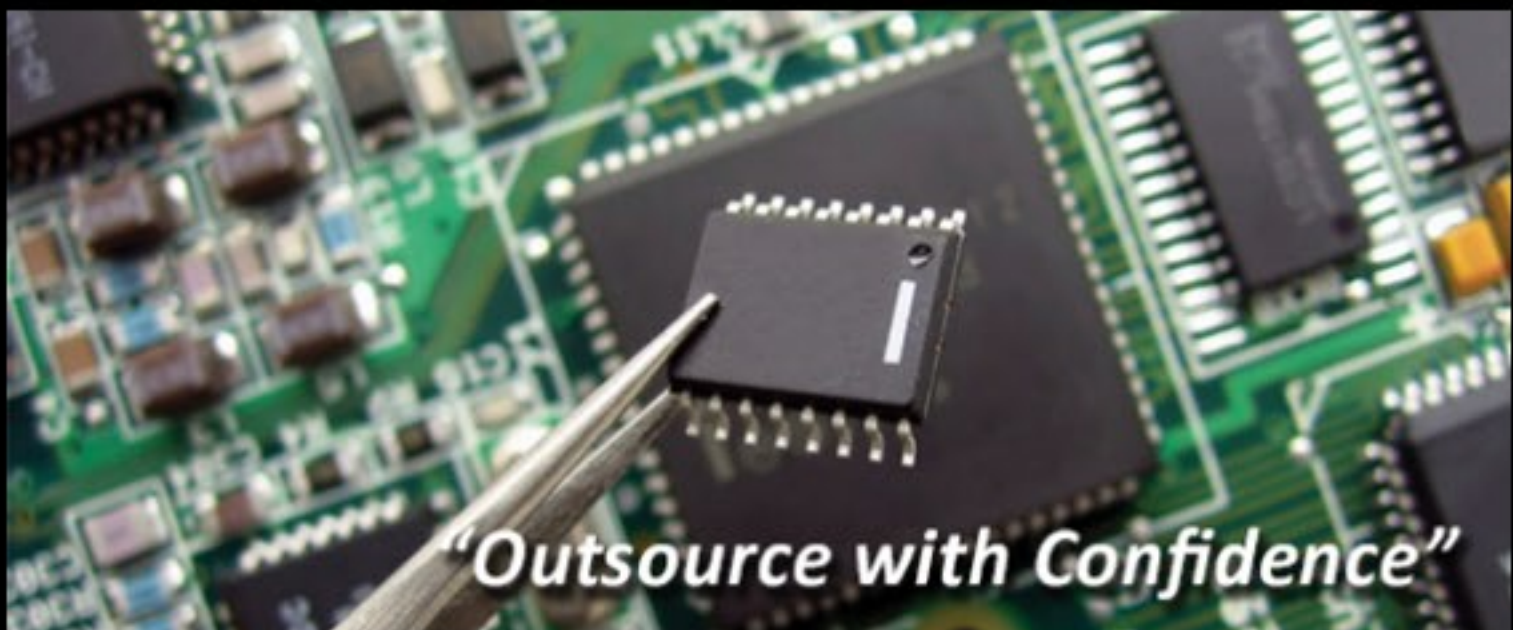

Sorry to bring it up but yes its only 13 weeks away! So, along with all the festivities we have public holidays, component factory shutdowns, longer material lead-times plus other disruptions to supply. And funny enough, our busiest period traditionally has been the Christmas – New Year period - so we like to start planning early.

We haven't yet confirmed our shut down period so when you have a chance please look at your production requirements for January and beyond. Remember, we're more than happy to schedule and hold product for you to ensure deadlines are met.

We will advise our shut down dates first up in December once we have determined requirements.

Talk to your TCM representative today about your Christmas and New Year requirements.
